

Kahlil Calavas

Creative technologist · Spatial computing · Web development

kahlilcalavas@gmail.com | 860-834-4959 | <https://kahlilcalavas.dev>

Professional Summary

Creative technologist and CTO at TerraLux working across web platforms, digital twins, augmented reality, and immersive storytelling. Combines React, TypeScript, and Unity development with on-site capture, interface design, and a decade of professional web development. Builds tools and experiences that connect people, places, and ideas.

Professional Experience

TerraLux / The Futurist Network | Chief Technology Officer

Aug 2022 - Present

- Develop and maintain The Futurist Network with React, TypeScript, and Supabase: a digital twin, project management, and social platform for designing, building, and funding businesses.
- Develop a Unity-based iOS platform for world-scale augmented reality, connected to the Futurist Toolkit and location datasets.
- Create architectural visualizations, digital twins, and 3D captures; demonstrate spatial systems through mixed reality map tables and public showcases.
- Support technology operations, fundraising presentations, and investment outreach.

BehindTheChair.com | Web Development | WordPress & Next.js

Apr 2023 - Aug 2024

- Maintained WordPress, Shopify, and Thought Industries learning platforms; integrated third-party APIs and plugins.
- Developed headless WordPress experiences with Next.js 13, Vercel, and WP Engine, collaborating across teams using Git.

The Walker Group | Front End Web Developer

Jul 2020 - Apr 2023 | Farmington, CT

- Built WordPress themes, plugins, and API integrations with cross-functional teams.
- Managed backups, updates, quality assurance, and Git-based development workflows.

Selected Projects

Future Lens: Digital twins, 360-degree tours, and location-based AR that connect capture, spatial editing, and real-world experiences. Portfolio includes IX Art Park, Big Hollow Greene, and Alan Day Community Garden.

Future Lab: A setting for builders, artists, and technologists to share ideas, demonstrate immersive tools, and develop projects through gatherings and working sessions.

Tree XR & Boxboi: Wearable AR collaboration with Paige Dansinger and Marc Pettersen at the AWE 2026 Snap / Reality Hack; solarpunk storytelling and virtual worldbuilding through Boxboi.

Kahlil Calavas | Resume, continued

GraVoc Inc. | Front End Web Developer

Oct 2019 - Jul 2020 | Peabody, MA

- Developed WordPress themes and plugins, maintained websites across multiple frameworks, and deployed Firebase applications.
- Built an internal web development code wiki and coordinated projects through GitHub.

Miranda Creative | Front End Web Developer

Dec 2017 - Feb 2019 | Norwich, CT

- Translated Sketch designs into interactive WordPress themes using Genesis and Advanced Custom Fields.
- Maintained client websites, supported proposals, and improved accessibility for Connecticut library websites.

Systematic Automation | Front End Web Developer

Jan 2016 - Nov 2017

- Migrated static websites to WordPress and developed custom themes, plugins, and search-optimized machine sales pages.
- Created a machine directory combining video, photography, and interactive product presentations.
